Appendix A

A note about predatory conferences

The RSC advises all Applicants to be cautious when choosing conferences or meetings to attend. There are an increasing number of so-called "predatory conferences" which are expensive and provide little or no scientific benefit for the attendees. This Chemistry World article provides more information about "predatory conferences" and below is a list of potential warning signs to look out for when considering attendance at an unfamiliar conference or meeting ("Meeting").

If Applicants have any concerns or doubts about a Meeting, please do not hesitate to contact the RSC before applying for a Researcher Development and Travel Grant.

The RSC will also inform Applicants as soon as possible if the RSC spots an application for attendance at a suspected "predatory conference". The RSC are unable to support grant applications for "predatory conferences".

Potential signs of a "predatory conference" are:

- the conference organiser is holding multiple meetings on the same day(s) and in the same location;
- the conference venue does not reflect the supposed size of the meeting (e.g. a "World Congress" that is held in a hotel, rather than a conference centre);
- there is an unusual combination of words and phrases, or loosely related fields of study, in the conference name;
- photos of previous meetings on the organiser's website only show meetings of about a dozen participants in a small meeting room;
- the Applicant has been invited to give a talk in a subject matter outside of their expertise;
- the invitation addresses the Applicant in superlative terms;
- the conference has an unusually broad subject matter or coverage;
- the language of the invitation is unusual for the Applicant's professional practice or has grammatical errors;
- the editorial board or conference organisers are not well-known in the Applicant's research field;
- the "business" address of the organiser is unusual (e.g. if Google Street View shows it to be a residential address);
- the registration fee is high or if invitations are repeatedly sent to the Applicant;
- the conference website does not include subject matter that is at the frontier of knowledge;
- the high-level speakers in the programme are listed as "subject to confirmation"; or
- the Applicant does not recognise the journal, conference or participants.
